

# Lanthanum LV Eyepieces

**A Vixen-designed eyepiece that uses low-dispersion Lanthanum glass.**

- 3-group / 5-element or 4-group / 7-element design
- The extra-long 20mm eye-relief is prized for eyepiece projection imaging and allows comfortable observation, even with glasses
- Design virtually eliminates ghosting and flare
- Fold-down rubber eyeguards
- Fully Multi-Coated

## Lanthanum Advantage

"Half the price of other Long-eye relief models, the Vixen Lanthanum eyepieces are ideal on small scopes that can't handle hefty wide-field eyepieces, providing good eye relief and a tall eyepiece for comfortable viewing."

"Among the best values in quality wide-angle eyepieces are the Vixen Lanthanum Superwides, made by Vixen of Japan. Each features 20mm of eye relief - an added bonus. Edge performance is very good ...."
