

Vixen[®] AM-AD-2576 Large Accessory Plate DX

This heavy-duty plate contains a variety of smooth and threaded holes for mounting tube/accessory rings, fine adjustment units, guide scopes, etc.. The large accessory plate DX makes an excellent platform for mounting scopes side-by-side for imaging/guiding or optical comparison. Great for custom mounting home-built and non-Vixen tubes to Vixen-style equatorial mounts. Has 35mm spaced 8mm holes for Takahashi mounts. The plate comes with removable dovetail rail and an assortment of 1/4"-20, M8-1.25 and M6-1.0 bolts. Fits GP-, SX- and Atlux-series mounts. Outer dim.: 330mm x 120mm / ~13" x 4.75".

Included dovetail rail and hardware not shown

- 8 x 1/4"-20 threaded holes
- 10 x M8-1.25 threaded
- 2 x 9mm inner/15mm outer through holes
- 16 x 7mm through holes

The accessory plate has a detachable dovetail rail on the bottom (44mm x 167mm / 1 3/4" x 6-9/16") for Sphinx and GP-series mounts. The dovetail rail has slots for two supplied bolts to mount it into any of several pairs of 1/4"-20 threaded holes along the long center-line of the plate. Depending on how the rail is mounted, access to some of the holes will be obstructed. Holes on either side of this centerline are in recesses 7mm deep.
